

# Twitter Share App User Guide

The Twitter app allows visitors to tweet a link to your page on Twitter. Post an overview of important announcements on your site and use the app to tweet a link to the page. Gain more exposure to your webpage and share your information via social media with a simple click!

Add the Twitter Share app

Drag the Twitter app onto your page.

Twitter Share

Edit Options

Allow users to tweet with a link to your page. If you want, you can enter a Twitter user name which will be included in each tweet.

\* Twitter User Name:

Save Cancel

1. Enter the *Twitter User Name* you want to include with each tweet.
2. Select *Save*.

How it looks on Twitter

## Set additional options

The image shows a dialog box titled "Twitter Share" with two tabs: "Edit" and "Options". The "Options" tab is selected. The dialog is divided into sections: "General" (with an expand/collapse arrow), "App Name:" (with a text input field containing "Twitter Share"), "Description:" (with a text area), a checkbox for "Show the app name on my page.", "Display Settings:" (with a sub-header and a note: "You can display every active record in this app on your page, or a specific number of records at a time."), and two radio button options: "Display all active app records" (selected) and "Display a specific number of active app records". At the bottom, there is a "Sharing" section (with a collapse arrow) and two buttons: "Save Options" and "Cancel".

1. Select *Options*.
2. Enter the *App Name* to use as the title.
3. Enter the *Description*.
4. Select *Show the app name on my page* to display the updated app name.
5. Choose the *Display Settings* for the number of posts to list.
